Education

University of Southern California

M.S. in Engineering Management

Coursework: Supply Chain Management, Spreadsheet Modeling, Global Operations Management

Los Angeles, United States

Jan 2025 – Dec 2026 (Expected)

Pandit Deendayal Petroleum University

B.Tech. in Mechanical Engineering

Coursework: Manufacturing Processes, Mechanics of Materials, Optimization Techniques

Gandhinagar, India

Aug 2019 – May 2023

Skills

Supply Chain & Operations: Inventory Planning, Distribution Center Operations, Supply Network Analysis, Process Mapping, Lean Six Sigma, Kaizen, PDCA, RCA

Program & Project Management: Cross-Functional Stakeholder Coordination, Project Scheduling, Risk Registers, Change Control, Agile, Technical Documentation

Analytics & Systems: Advanced Excel, SQL, Python, Power BI, Excel Solver, R, MS Project, SAP S/4HANA, PowerShell, Arena PLM

Work Experience

Generac

Santa Monica, United States

Supply Chain Intern

June 2026 – Aug 2026

- Analyzed engineering BOMs, annual demand, supplier quotations, and cost targets across **20+ priority PWRmicro components**; identified a **\$1.2M annualized sourcing opportunity** and translated cost gaps into execution priorities
- Coordinated cross-functional stakeholders across engineering, sourcing, and suppliers to resolve missing specifications, drawings, reliability reports, quotations, and **change-control data**
- Automated BOM, quotation, and document reconciliation using **Advanced Excel and PowerShell**; identified quantity, part-number, and pricing exceptions to accelerate data-driven decisions

USC Bookstore - Distribution Center

Los Angeles, United States

Supply Chain Operations Assistant

June 2025 – Aug 2025

- Managed **end-to-end inventory flow and stock control** for **1,000+ SKUs**, using Lean Six Sigma workflows, ERP cycle counting, and variance audits to improve inventory accuracy above **98%**
- Built Excel-based reconciliation and exception-detection tools that reduced **restocking cycle time by 15%** and manual errors by **10%**, improving distribution execution
- Partnered with warehouse supervisors to redesign stock-flow layouts using **process mapping and slotting analysis**, improving picking accuracy and reducing fulfillment delays

Vindeep Expo Engineers

Vapi, India

Supply Chain Analyst

Sept 2023 – May 2024

- Managed **multi-site operational projects** from planning through execution, translating statutory and technical requirements into schedules, risk registers, and compliance plans that maintained **100% regulatory adherence**
- Built a centralized Excel and MS Project dashboard that consolidated operational data, improved performance visibility, and reduced **audit preparation time by 15%**
- Applied **Kaizen and PDCA** to identify operational bottlenecks and implement process changes, improving workflow efficiency by **20%** and reducing equipment downtime

Larsen & Toubro

Surat, Gujarat

Project Management Intern

Dec 2022 – May 2023

- Coordinated cross-functional mechanical, electrical, and Python automation workstreams using **Agile project management**; delivered a portable robotic welding monitoring system that improved defect detection and process reliability by **20%**
- Developed Excel-based supplier evaluation, cost-benefit, and sensitivity analyses that supported feasibility decisions and reduced projected implementation costs by **10%**

Banco Products (India) Ltd.

Vadodara, India

Quality and Operations Intern

May 2022 – July 2022

- Conducted process audits using **RCA, FMEA, SPC, and Lean tools**, identifying **10+ bottlenecks**; led a Kaizen and 5S initiative that reduced welding-related costs by **12%**

Projects

Supply Network Decision Workbench (Python, MCP, SQL/ERP Integration)

May 2026 – June 2026

- Built a Python-based decision workbench over structured data for a **simulated 12-plant supply network**, enabling KPI segmentation, evidence retrieval, opportunity sizing, and traceable operational recommendations
- Analyzed cost and execution risks across network nodes and documented reusable tool schemas, implementation handoffs, and **SQL/ERP integration points** for nontechnical users

Inventory Planning Optimization (Excel Solver, R, Forecasting)

Aug 2025 – Nov 2025

- Built a demand-driven inventory planning model comparing FOQ, LFL, and POQ policies under forecasting, replenishment, cost, and service-level constraints
- Used **Excel Solver, R forecasting, and sensitivity analysis** to reduce modeled inventory costs by **8%–15%** while maintaining target fill rates
